Microsoft

3 steps to accelerate GDPR compliance in your organization
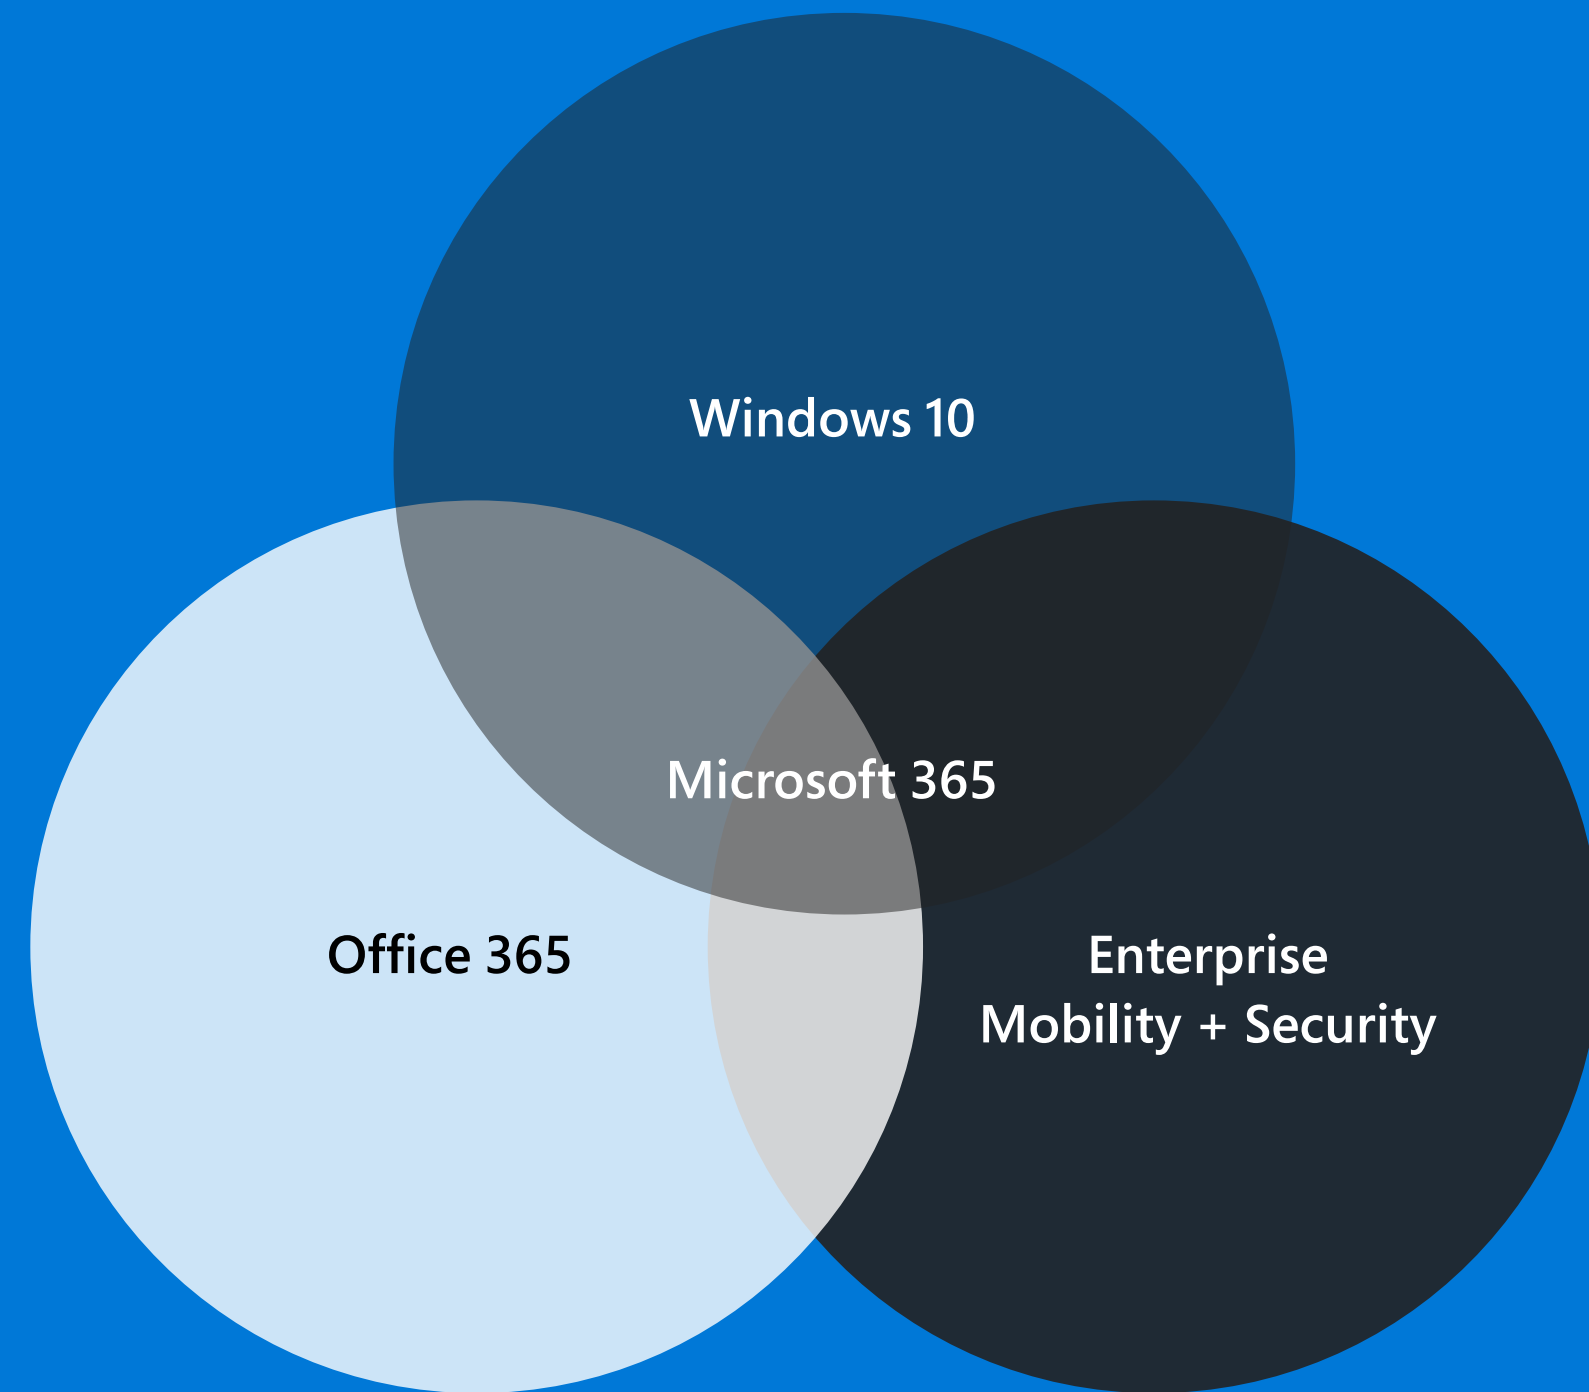

Microsoft is uniquely positioned to help you with the GDPR

Microsoft 365 brings together the best of Windows 10, Office 365, and Enterprise Mobility + Security to help secure and manage the environment.

Windows 10

Microsoft 365

Office 365

Enterprise
Mobility + Security

01 Assess and manage your compliance risk

A real-time assessment of your compliance posture with actionable insights to improve your data protection capabilities.

02 Protect your most important data

Integrated data governance and protection of your sensitive data across devices, apps, cloud services, and on-premises environments.

03 Streamline your reporting process

Built in audit-ready tools that help you collaborate between teams and manage your reporting processes.
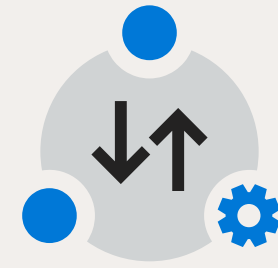

2

01.

Assess your company's risk.

Compliance manager

Manage compliance posture from one place and conduct real-time risk assessment, providing one intelligent score that reflects your compliance performance against data protection regulatory requirements. Generate actionable insights and simplify the compliance process.

02.
Help protect personal data.

Information protection

Microsoft information protection solutions across Microsoft Azure Information Protection and Office 365 Advanced Data Governance provide an integrated classification, labeling, and protection experience, enabling persistent governance and protection of your sensitive data across devices, apps, cloud services, and on-premises environments.
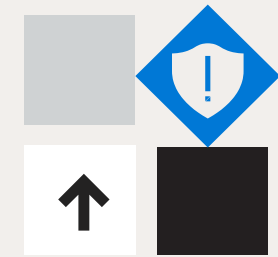

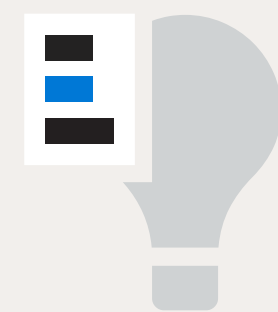

Advanced threat protection

Improve your threat detection capabilities with Azure Advanced Threat Protection, Windows Defender Advanced Threat Protection, and Office 365 Advanced Threat Protection.

Cloud app security

Helps you identify high-risk and abnormal usage, alerts you to potential breaches, and allows you to create policies to track high-risk actions. New updates give you even better visibility and control over Office 365.

Threat itelligence

Threat Intelligence in Office 365 and built into Windows 10 provides deep insights into advanced threats to help you quickly and effectively enable alerts, dynamic policies, and security solutions.

03 .

Streamline reporting.

Office 365 eDiscovery and advanced eDiscovery

Machine learning technologies quickly and precisely identify documents relevant to a particular theme to help you find text and metadata in content across your Office 365 assets.
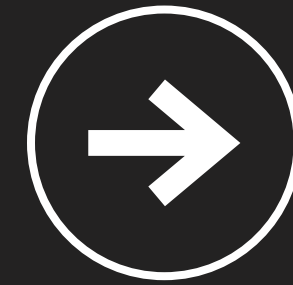

Customer lockbox

Meet compliance obligations for explicit data access authorization during service operations.

This content is a commentary on the GDPR, as Microsoft interprets it, as of the date of publication. We've spent a lot of time with GDPR and like to think we've been thoughtful about its intent and meaning. But the application of GDPR is highly fact-specific, and not all aspects and interpretations of GDPR are well-settled.

As a result, this content is provided for informational purposes only and should not be relied upon as legal advice or to determine how GDPR might apply to you and your organization. We encourage you to work with a legally qualified professional to discuss GDPR, how it applies specifically to your organization, and how best to ensure compliance.
